

Functions 2

AGENDA:

- Keyword arguments
- Default arguments
- Scope ↵
global

def random (a , b , c , d)

random (5 , 8 , a=0 , b=3)

a got 2 values
b got 2 values

c & d got no values

def random (a , b , c , d)

random (a=7 , b=5 , 2 , 1)

Keywords
args

Positional
Args

Error

As soon as a keyword arg is encountered,
Python forgets the order

Break till 10:00 PM

Simple Interest

P - Principal, R - Rate, T - Time

$$S I = \frac{P \times R \times T}{100}$$
